Tab 10 — Time Series Decomposition

Decompose CO(GT) into Trend + Seasonality + Residual components — same framework as P5 CocaCola Stock.

Select pollutant to decompose:

CO(GT)

Trend Range

0.88 – ...

Seasonal Amplitude

0.93

Residual Std

0.448

Seasonal component shows clear weekly cycles — weekday vs weekend pollution rhythm.

Trend component reveals whether overall air quality

improved or deteriorated over the study period.

 Residual spikes correspond to unusual pollution events — possibly industrial accidents or extreme weather.
