

Tab 6 — Missing Values & Imputation

	Column	Missing	Missing%	Action
0	Date	114	1.2	—
1	Time	114	1.2	—
2	CO(GT)	1797	19	DROPPED (90.3% missing)
3	PT08.S1(CO)	480	5.1	Median imputation
4	NMHC(GT)	8557	90.3	Median imputation
5	C6H6(GT)	480	5.1	Median imputation
6	PT08.S2(NMHC)	480	5.1	Median imputation
7	NOx(GT)	1753	18.5	Median imputation
8	PT08.S3(NOx)	480	5.1	Median imputation
9	NO2(GT)	1756	18.5	Median imputation

Missing % — Visual

Missing Data % per Column (after -200 → NaN)

⚠️ ****NMHC(GT)**** — 90.3% missing. This column is structurally incomplete. The reference analyzer for NMHC was not calibrated. Dropped from all analysis.

📌 ****Imputation strategy:**** Median used for all numeric columns. Median is robust to outliers — preferred over mean for skewed pollutant distributions.

✅ After dropping NMHC(GT) and median-imputing others, dataset is complete and ready for ML.
